linkedin.com/in/nathanspinetti/

Full Stack Software Engineer specializing in **React, TypeScript, Python**, and **AWS serverless architectures**. Experienced in building **real-time event platforms**, **scalable APIs**, and **AI-powered features** used by thousands of users across high-traffic SaaS environments.

Relevant Work Experience

Workhuman – Software Engineer III (Full Stack)

May 2022 – Present | Remote/Framingham, MA

- Architected and rebuilt the Gratitude Bar live event platform using **AppSync GraphQL**, **DynamoDB**, and **WebSocket subscriptions**, supporting **5,000+ concurrent users**, **increasing engagement by 264%**, and **reducing monthly cloud costs by about 80%** through database and infrastructure redesign.
- Led end-to-end delivery of scalable event platform features, partnering cross-functionally with **product, design, and marketing**.
- Led development of **reusable front-end systems** with **Next.js**, **React**, and **Tailwind** while contributing to the supporting APIs and infrastructure, reinforcing **end-to-end ownership** across customer-facing products.
- Designed and maintained serverless backend services with **AWS Lambda**, **AppSync**, and **API Gateway** to **support real-time and asynchronous workflows**.
- Owned **deployment pipelines** and **cloud infrastructure** across frontend and backend systems, improving release reliability through **CI/CD automation**.
- Led migration of the Workhuman Live marketing platform from **WordPress** to **headless Contentful** and **Next.js**, **improving Lighthouse performance from 49 to 99** and **reducing load time by 86%**.
- Built and evaluated an **AI-powered conversational search** prototype using **Python**, **AWS Lambda**, and the **OpenAI API**.
- Mentored engineers and contributed to code review standards, testing practices, and technical planning.

Nestly.dev – Contentful Platform Tooling

Sep 2024 – Present | Remote/Plymouth, MA

- Designed and built **internal Contentful editor tooling** using **React** and **TypeScript** to improve content operations across **ABM**, **Product Marketing**, and **Events teams**.
- Developed **publicly installable Contentful apps** for **Repeater** and **Conditional Fields** workflows, enabling more flexible and efficient editor workflows.
- Built **reusable CMS tooling** that reduced manual content entry and improved editor experience for complex structured content.
- Created a **publicly installable AI-powered alt text generator** using **Python** and **AWS**, **adopted by approximately 40 editors** across the marketing organization to **improve accessibility, SEO, and publishing efficiency**.
- Standardized and scaled content workflows by making internal tooling reusable across multiple marketing teams.

Education

Boston University

Masters of Science in Software Development,
Web Application Development Focus

Johnson & Wales University

Bachelors of Science in Graphic Design,
Web Design Focus

UX Design Professional Certificate

Skills

Languages: TypeScript, JavaScript, Python, PHP

Frontend: React, Next.js, Tailwind, HTML, CSS, SCSS, Design systems, WCAG Accessibility, SSR/SSG

Backend & APIs: Node.js, GraphQL, REST APIs

Cloud & Infrastructure: AWS Lambda, AppSync, API Gateway, DynamoDB, serverless architectures

Tools: GitHub, Vercel, Contentful

MP – Frontend Web Developer & Designer

Aug 2020 – Apr 2022 | Remote/Beverly, MA

- Developed and maintained a responsive WordPress marketing site using **PHP, JavaScript, jQuery**, and **SCSS** to support business and campaign needs.
- Owned much of the frontend implementation workflow independently, translating design and content needs into functional, branded web experiences.
- Built and maintained reusable page components and styling patterns to support consistency across the site.
- Improved responsiveness, usability, and maintainability through iterative site enhancements and ongoing support.
- Contributed across both design and development, gaining hands-on experience in end-to-end website delivery within a self-directed workflow.

Freelance – Web Developer & Designer

Sep 2019 – Present | Remote/Plymouth, MA

- Designed and developed custom WordPress websites for **3 paid clients** and **6 early-career client engagements**, delivering tailored solutions for varied business needs.
- Created brand look-and-feel systems for paid clients and translated them into reusable custom WordPress environments.
- Led projects across branding, UI design, CMS implementation, and launch, adapting each build to client goals and technical requirements.
- Built reusable frontend patterns and WordPress components to improve consistency and maintainability.
- Provided post-launch support including content updates, styling refinements, and feature enhancements.
