Frontend-focused Full Stack Developer with 5+ years building **high-performance, accessible, and scalable marketing web apps** for hundreds of thousands of users. Expert in **TypeScript, Next.js, React, and CSS fundamentals**, with experience in **SSR/SSG**, reusable component systems, and performance optimization. Skilled at partnering with design and marketing teams to deliver **beautiful, user-focused experiences**, and building complex systems from the ground up.

Relevant Work Experience

Workhuman – Web Developer III (Full Stack)

May 2022 – Present | Remote/Framingham, MA

- Partnered with **design, brand, and marketing** teams to deliver visually compelling, scalable web experiences for audiences in the hundreds of thousands.
- Led complete redevelopment of **Workhuman Live** marketing site from WordPress to **headless Contentful + Next.js** with SSR/SSG – improved Lighthouse score **49 > 99**, cut load time **86%**, and achieved **WCAG accessibility compliance**.
- Designed and implemented **reusable, performant front-end systems** serving thousands of daily visitors, optimizing for maintainability and accessibility.
- Architected and deployed **front-end and back-end infrastructure** for build, test, and deploy workflows, including CI/CD pipelines.
- Rebuilt the **Gratitude Bar live event app** from scratch (5K+ attendees) using WebSockets, AWS AppSync (GraphQL), and DynamoDB – **264% increase in engagement**.
- Developed a **real-time AI chatbot** (Next.js, Python, OpenAI API, AWS Pipeline) replacing static search with conversational queries, designed for scalability across support and sales.
- Led cross-functional planning, roadmapping, and ticket triage; mentored engineers, improved test coverage, and set **code review standards**.

Nestly.dev – Contentful App Creator & Maintainer

Sep 2024 – Present | Remote/Plymouth, MA

- Repeater App:** Reduced schema complexity by grouping repeatable fields into JSON, enabling scalable content models across multiple environments.
- Conditional Fields:** Implemented dynamic field logic for cleaner editor UX in content types.
- AI Alt Text Generator:** Integrated OpenAI with AWS pipeline to generate contextual image descriptions, improving **SEO and accessibility** for web and social content.
