

Nathan Spinetti

Frontend-Focused Full Stack Engineer

Plymouth, MA · (774) 283-3343 · nate.spinetti@gmail.com · nathanspinetti.com · github.com/natespinetti · linkedin.com/in/nathanspinetti

Summary

Frontend-focused full stack engineer with a track record of solving complex platform challenges — rebuilding systems for scale, optimizing performance, and delivering reliable production features. Experienced with React, TypeScript, Next.js, and AWS across SaaS products ranging from high-traffic marketing platforms to real-time event infrastructure. Combines engineering execution with a formal design background, bringing stronger UX judgment and frontend polish to teams.

Stack: TypeScript · JavaScript · React · Next.js · Tailwind CSS · GraphQL · Node.js · AWS (Lambda, AppSync, DynamoDB) · Python · Contentful · Figma · Vercel

Work Experience

Software Engineer III (Full Stack) · [Workhuman](#)

May 2022 – Present

- Architected and rebuilt the Gratitude Bar live event platform using AppSync GraphQL, DynamoDB, and WebSocket subscriptions — supporting 5,000+ concurrent users, increasing engagement by 264%, and reducing monthly cloud costs by ~80%.
- Led development of customer-facing web experiences including a 20-page event platform with ~100 subpages, serving ~200,000 monthly visitors and driving ~3,000 annual conversions to a \$2,000+ ticketed event, using Next.js, React, TypeScript, and Tailwind with reusable component systems.
- Improved site Lighthouse performance score from 49 to 99, reducing page load time by 86% through targeted frontend optimization.
- Designed and maintained serverless backend services with AWS Lambda, AppSync, and API Gateway, leading end-to-end feature delivery in partnership with product, design, and marketing.
- Mentored 2 engineers, including leveling one up from WordPress-level PHP/HTML to a modern AI-first workflow using Cursor, Next.js, TypeScript, and React.

Contentful Platform Tooling Developer · [Nestly.dev](#)

September 2024 – Present

- Built internal Contentful tooling in React and TypeScript across ABM, Product Marketing, and Events teams — releasing 3 publicly installable apps for repeater, conditional field, and an alt text generator tool, enabling editors to replace multi-type content structures with a single clean model.
- Shipped an AI-powered alt text generator using Python and AWS — adopted by ~40 editors and used 10,000+ times, improving accessibility compliance and SEO output at the click of a button.

Frontend Engineer · [MP \(MassPay\)](#)

August 2020 – April 2022

- Led frontend development of a 25-page marketing site serving ~20,000 monthly visitors with a consistent 3% conversion rate, owning ongoing feature delivery and iterative improvements.
- Executed a full site rebuild and rebrand, delivering improved information architecture, refreshed visual identity, and a performance-optimized custom CMS implementation.
- Established reusable components and styling patterns using PHP, JavaScript, jQuery, and SCSS, improving consistency and reducing duplication across the codebase.

Web Developer · [Freelance](#)

September 2019 – April 2025

- Delivered websites for 3 paid clients and 6 early-career engagements — owning full lifecycles from brand identity and visual direction through frontend implementation, CMS build, and post-launch support.

Projects

Gratitude Bar — Live Event Platform *(login required)*

Real-time recognition platform built for large-scale corporate live events, supporting 5,000+ concurrent users with live WebSocket feeds, animated gratitude displays, and a high-throughput event-driven backend. Rebuilt from the ground up to dramatically reduce latency, cut infrastructure costs by ~80%, and increase attendee engagement by 264%.

Stack: *Next.js, React, TypeScript, Tailwind CSS, AppSync GraphQL, DynamoDB, WebSocket, AWS Lambda*

Workhuman Live — Event Websites workhumanlive.com

Suite of customer-facing event marketing sites built with Next.js, React, TypeScript, and Tailwind — a 20-page core site with ~100 subpages serving ~200,000 monthly visitors and driving ~3,000 annual conversions to a \$2,000+ ticketed event. Rebuilt for performance, improving Lighthouse score from 49 to 99 and reducing page load time by 86%.

Stack: *Next.js, React, TypeScript, Tailwind CSS, Vercel, Figma*

Nestly — Contentful Apps nestly.dev

3 publicly installable Contentful apps built in React and TypeScript: a repeater field tool, a conditional field workflow app, and an alt text generator tool — used across marketing, ABM, and events teams to improve editor experience and content modeling at scale.

Stack: *React, TypeScript, Contentful, Python, AWS*

Skills

Languages: TypeScript, JavaScript, Python, PHP

Frontend: React, Next.js, Tailwind CSS, HTML, CSS, SCSS, design systems, accessibility, SSR, SSG

CMS: Contentful, custom CMS tooling

Backend & APIs: Node.js, GraphQL, REST APIs

Cloud & Infrastructure: AWS Lambda, AppSync, API Gateway, DynamoDB, serverless architectures

Tools: GitHub, Vercel, Figma

Education

MS in Software Development · [Boston University](#)

Focus: Web Application Development — Software Design & Patterns, Rich Internet Applications, Server-Side Development, Data Structures & Algorithms

BS in Graphic Design · [Johnson & Wales University](#)

Focus: Web Design — UI/UX Design, Print Design, Product Design, Adobe Creative Cloud

Certifications

Google UX Design Certification · [Coursera](#)

User-centered design, research, usability testing, wireframing, prototyping, accessibility, and iterative design refinement.

Graduate Certificate in Web Application Development · [Boston University](#)

Full stack web development covering JavaScript, HTML5, CSS, Vue.js, Angular, PHP, Node.js, MySQL, and MongoDB.
